1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 41-58, drawn to a dispenser.

Group II, claim(s) 59, drawn to a method of dispensing a material from a reservoir of a dispenser into a container.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the special technical features of Group I is a dispenser including a barrier formation to prevent the material entering the container, a closure provided in the dispenser to permit material to be removed from a container, a conduit extending through the dispenser to permit the removal of the material from the container via the closure while the special technical features of Group II is a method of dispensing a material from a reservoir of a dispenser into a container by rotating a first portion of the dispenser relative to a second portion and axially displacing the first portion relative to the second portion.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
